No eclipse escolha o console

The screenshot shows a portion of an IDE's interface, specifically the 'Console' tab. The title bar of the console window reads 'Tomcat v10.0 Server at localhost [Apache Tomcat] C:\Program Files\Java\jdk-11.0.11\bin\javaw.exe (12 de jul. d'. The console output displays an SQL insert statement and its arguments on separate lines: `/insert`, `carlos`, `999-9999999`, and `carlos@gmail.com`. The text is rendered in a monospaced font. A scrollbar is visible on the right side of the console area.

Adicionar

The screenshot shows the Eclipse IDE's console window. The title bar indicates it's the 'Console' tab. The text in the console shows a successful database insert operation using the 'Tomcat v10.0 Server at localhost' connector. The SQL command executed is `/insert` with the following values: `cris`, `111-111111`, and `nano2gmail.com`. The console output shows the command and its parameters, followed by a confirmation message.

```
Tomcat v10.0 Server at localhost [Apache Tomcat] C:\Program Files\Java\jdk-11.0.11\bin\javaw.exe (12 de jul. de 2022 17:57:57) [pid: 8932]  
  
/insert  
cris  
111-111111  
nano2gmail.com
```

Deu um erro tive que restartar o eclipse e executar o arquivo index.html ai resolveu o erro

13 public class Controller extends HttpServlet {
14     private static final long serialVersionUID = 1L;
15     //criando um objeto
16     DAO dao = new DAO();
17
```

The screenshot shows the Eclipse IDE with the following components:

- Project Explorer:** Displays the project structure for 'agenda'. The 'src/main/java' directory is expanded, showing 'controller' and 'model' subdirectories. The 'model' directory contains 'DAO.java' and 'JavaBeans.java'.
- Editor:** Displays the 'Controller.java' file. The code is as follows:

```
9 import model.DAO;
10 import model.JavaBeans;
11
12 @WebServlet(urlPatterns = {"/controller", "/main", "/insert"})
13 public class Controller extends HttpServlet {
14     private static final long serialVersionUID = 1L;
15     //criando um objetos
16     DAO dao = new DAO();
17     JavaBeans contato = new JavaBeans();
18
19     public Controller() {
20         super();
21     }
22
23     protected void doGet(HttpServletRequest request, HttpServletResponse resp
24         String action = request.getServletPath();
25     System.out.println(action);
```

A red arrow points to the line `JavaBeans contato = new JavaBeans();`.
- Bottom Panel:** Includes tabs for 'Markers', 'Properties', 'Servers', 'Data Source Explorer', 'Snippets', and 'Console'. The 'Servers' tab is active, showing 'Tomcat v10.0 Server at localhost [Stopped, Synchronized]' and 'agenda [Synchronized]'.

The screenshot displays the Eclipse IDE interface. The main editor shows the file `Controller.java` with the following code:

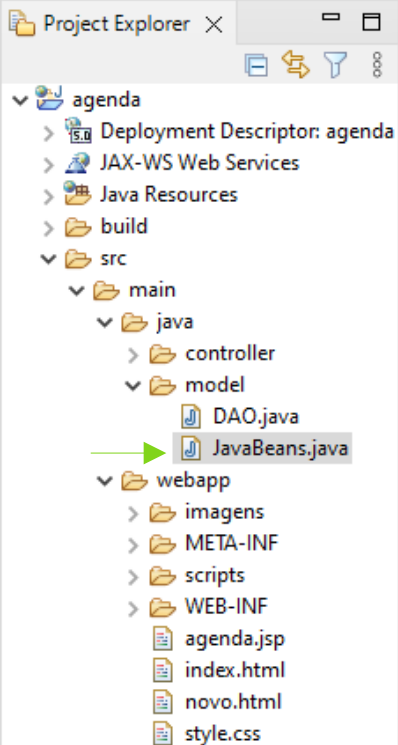

```
36 response.sendRedirect("agenda.jsp");
37 }
38
39 // Novo contato
40 protected void novoContato(HttpServletRequest request, HttpServletResponse response) {
41     //teste de recebimento dos dados do formulario
42     System.out.println(request.getParameter("nome"));
43     System.out.println(request.getParameter("fone"));
44     System.out.println(request.getParameter("email"));
45     // setar as variaveis JavaBeans
46     contato.setNome(request.getParameter("nome"));
47     contato.setFone(request.getParameter("fone"));
48     contato.setEmail(request.getParameter("email"));
49 }
50
51 }
52
```

The Project Explorer on the left shows the project structure:

- agenda
  - Deployment Descriptor: ager
  - JAX-WS Web Services
  - Java Resources
    - src/main/java
      - controller
      - model
        - DAO.java
